

MULTI AH FOON

FULL STACK DEVELOPER

ABOUT ME

Hi, my name is Multi. I'm a software developer that is passionate about all things tech, may it be in the realm of software or hardware. I'm ambitious and looking for a place to grow, not only in my technical skills but also in my human skills. My strengths lie in my growth mindset, being welcoming to feedback, self-motivated and enjoy working in teams.

TECHNICAL SKILLS

HTML, CSS, JavaScript, React.js, Redux.js, Node.js
Express, Knedx and SQLite

EXPERIENCES

Enspiral Dev Academy November 2020 - March 2021

A full immersion software development institution, emulating a real-life development environment as closely as possible in all that it may encompass.

Tech Skills:

HTML, CSS, JavaScript, Node.js, Express, React, Redux, Knex, SQL

Non-Tech Skills:

Sprints, standups, Nexus and Agile methodology

Project Role and Responsibilities:

I wore many hats when working on assignments and projects at EDA. My last role was product lead. As the product lead, I was active on all levels of the stack. I found that I was very comfortable as a lead but more importantly valued feedback from my peers as I take it as room for growth as a developer and as a person.

On my last project, my team built a developer portfolio platform. It was catered to employers searching for developers and to allow developers to display projects that they have worked on.

With my time at EDA, I learned many things but personally, my main takeaway was how to be an active listener. This allowed me to identify the needs of not only my peers but also the needs of the product owner and users.

Manukau Institute of Technology 2019 - 2021

An educational institute that provides degrees that encapsulate but not limited to web development.

Tech Skills:

HTML, CSS, js, python, java and SQL

Non-Tech Skills:

Standups, Agile methodology

Role and Responsibilities:

MIT is very proactive about team projects and the business side of tech. Being exposed to more than technology has allowed me to be more well rounded as a developer and as a team member. The non-tech skills gained and practised there were but not limited to, communication, understanding for people and a basic sense for business management.

Having gone through many group projects at MIT I've developed a habit to plan thoroughly on every project to reduce risk and to allow for better time management.

REFERENCES

Note: If possible, could I please be informed beforehand when contacting references so I can notify them to keep their phone nearby.

EDUCATION HISTORY

Manukau Institute of Technology
New Zealand Certificate
Information Technology Essentials (Level 4)

This certificate covers entry-level aspects of IT from computer hardware, operating systems, applications, databases and networks to software development, project management, web, user experience, and interface design.

Manukau Institute of Technology
New Zealand Diploma
Information Technology Technical Support (Level 5)

Continuing from the Information Technology Essentials Level 4 certification, the following topics are delved into with more depth, such as networking, database and systems administration, security and data management and the prevention, troubleshooting and resolution of technical issues.

Enspiral Dev Academy Web
Development Training Scheme
NZQA Level: (Level 6)

Enspiral Dev Academy is an immersive and intensive software development training Bootcamp. Training people in practical programming skills. The main focus is on producing talented individuals with both technical and practical skills that can hit the ground running as software developers in a commercial environment.
